

Postdoctoral position, Paul Scherrer Institut, Schweiz

We are looking for a researcher at the postdoctoral level with experience in at least one of the following topics: strongly correlated systems, unconventional superconductivity, topological phases of matter, quantum phase transitions, and non-equilibrium phenomena.

The position is associated with the SNSF Ambizione project entitled “New theoretical tools for the design and optimization of emergent phases of matter in complex materials.”

The starting date is flexible (between June 2022 and April 2023).

Funding for this position is guaranteed for one year.

To apply, please submit a CV and the name and contact of at least two references willing to provide letters of recommendation. Please send the material directly to: aline.ramires@psi.ch.
